Foundations of health information system

Data availability

Benefits

- Healthcare professionals have access to information they need
 - Faster and better help
 - Prevent double activities for diagnostics
 - More time for personal contact between patient/client and healthcare professional
- Patient has access to their record
 - More control by patients/clients
 - More options for shared decision making
- Possibilities for secondary use of data

The bigger picture: keeping healthcare accessible, affordable and high quality.

Process

8 main goals

1. Data availability
2. Minimal administrative burdens
3. Network of infrastructures
4. Datasolidarity and trust
5. Full participant
6. Governance
7. Domains
8. Health & ICT market

Drie fundamentele van de visie:

Databeschikbaarheid

Vertrouwen

Regie

1. Data availability is realized for health, care and prevention.

2.
Registration of data has
a minimal administrative
burden

3.
Data are available via
a national-wide network
of infrastructures

4.
Data solidarity
is realized, built on
trust

5.
Citizens and healthcare professionals are able to be a full member of the healthcare information system

6.
Governance across the whole
healthcare information
system is organized

7.
The healthcare information system stretches across the healthcare- social care and public health domain

8.
Openness of systems is guaranteed and there is an equal playfield in the health ICT market

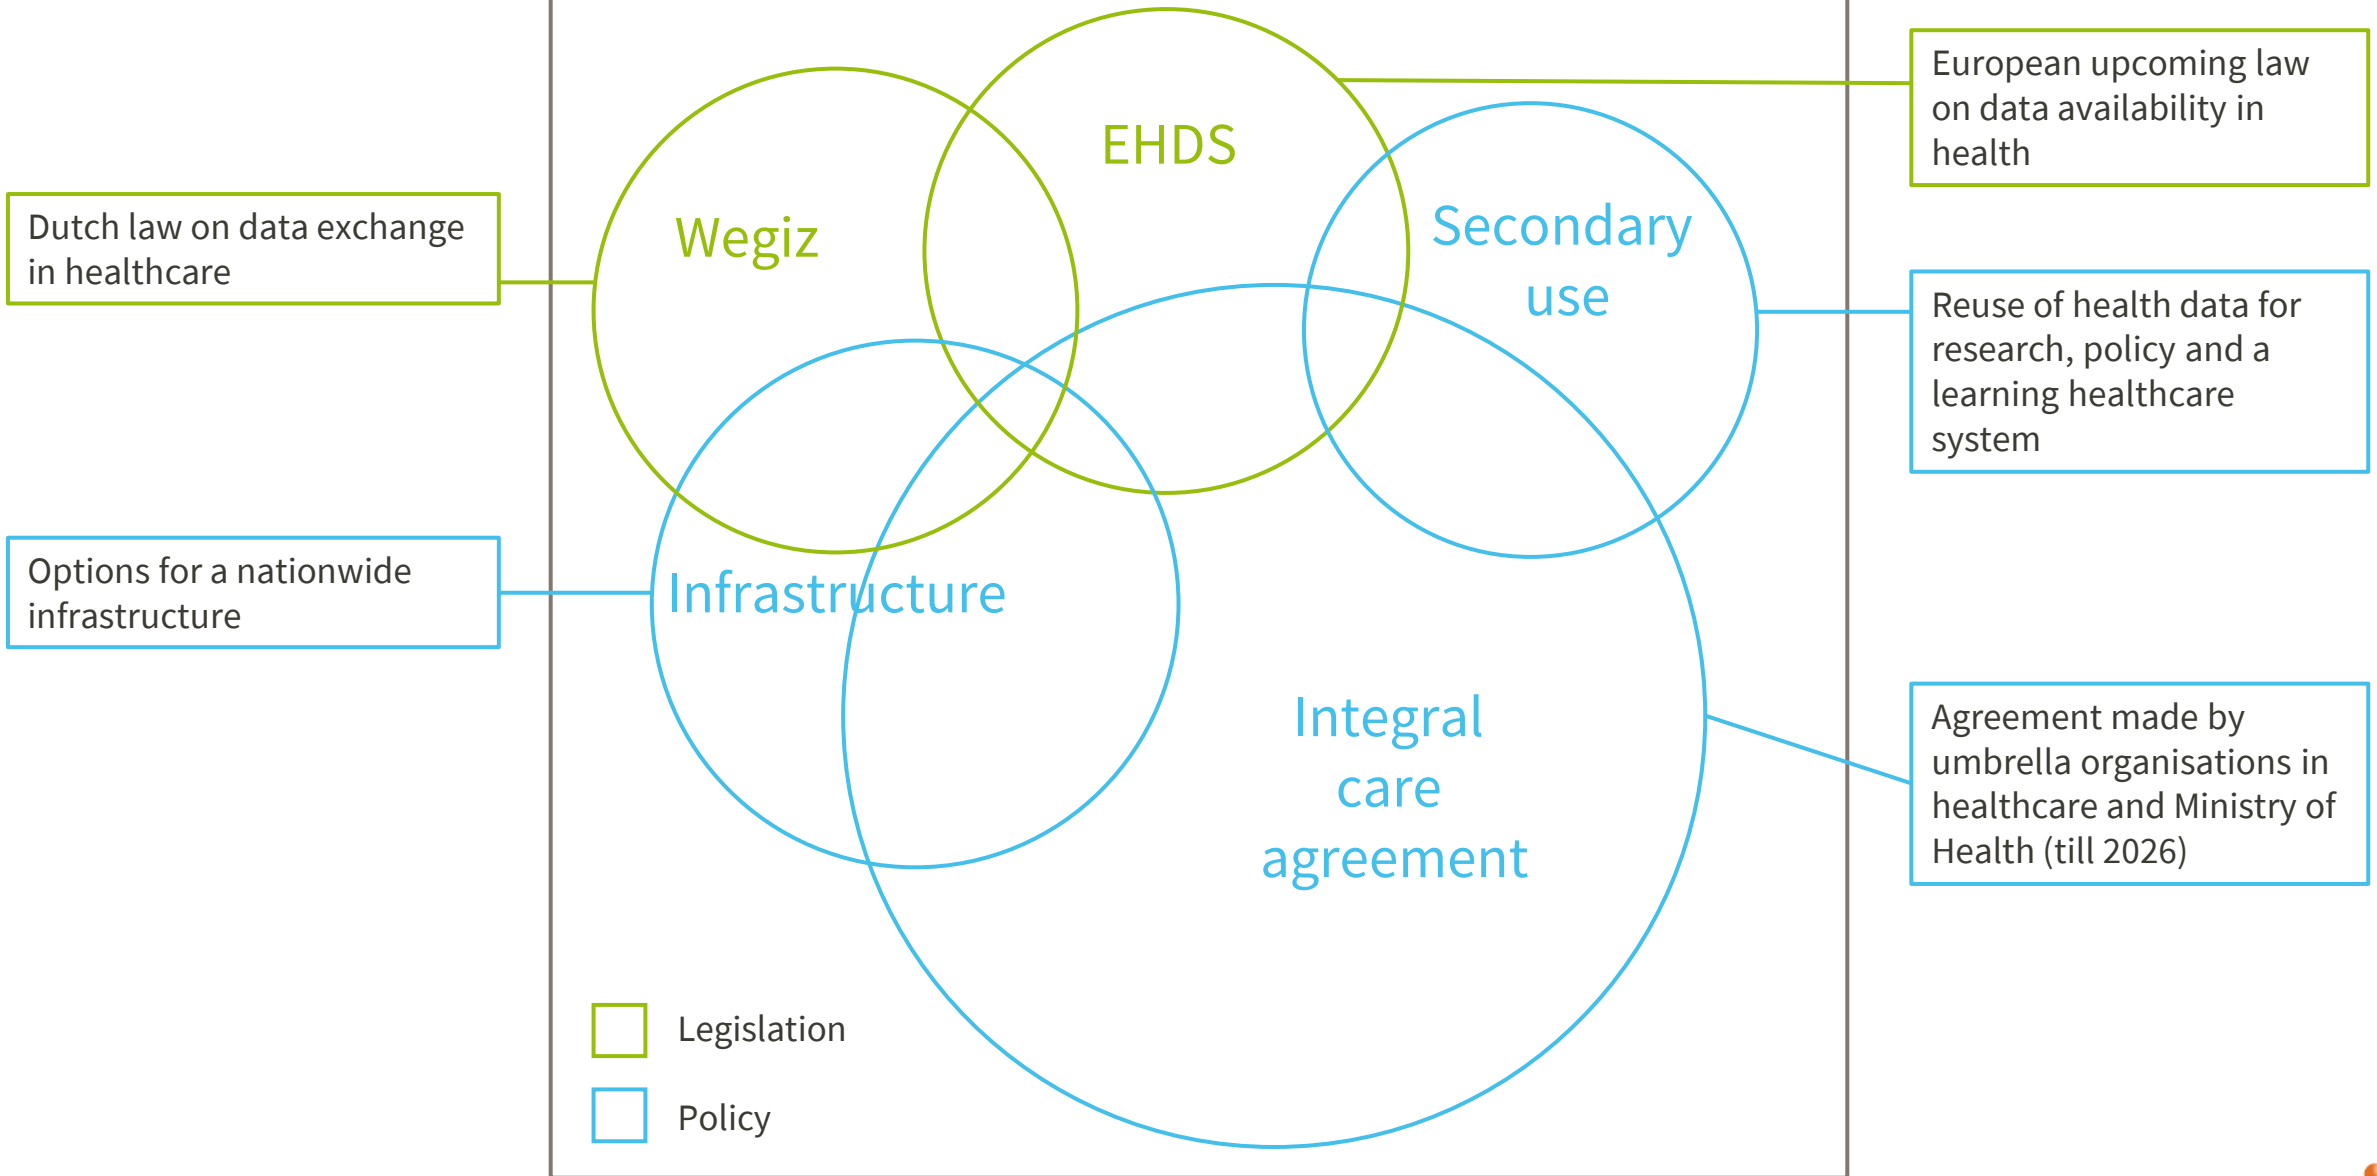

2023 - 2026

2027 - 2030

2031 - 2035
